

**Signs of the universe - singing nature -  
international eTwinning project  
2020./2021.**

The environment is defined as the space where humans live animals, plants, people, where is water and air. God has made the environment an accurate and balanced system, but human has caused imbalance in the balance created by God to satisfy his desires. Conversation of the environment is a collective responsibility shared by all individuals for a healthy and beautiful environment. In this project our students will learn more about the importance of the environment, environment concepts, components of the ecosystem and our role and the role of local community institutions in preserving the environment.

The image shows a screenshot of the eTwinning TwinSpace platform. At the top, there is a logo featuring two stylized figures and the text "eTwinning TwinSpace". Below the logo, the main content area is titled "I.1. Teachers - Partners in the project". This section displays a "Teachers' presentation" with two profiles. On the left, there is a sidebar with a "Pages" menu containing links like "About", "Location of partner schools on the map", "Useful information for Teachers", "Logo suggestions and editing", "Internet safety rules", "Educational materials for students", "Landscapes in partner countries", "Playing ecosystem", and "Caring for nature". At the bottom of the sidebar, there are "Archive" and "Create a page" buttons. The main content area also includes a "Create new" button.
